

SureSmile® Aligners: Introducing Solutions for a Better Treatment Experience

Press Contact

Dentsply Sirona offers SureSmile® VPro™, SureSmile® Retainers and SureSmile™ Whitening Kit as part of its SureSmile Clear Aligner system to help clinicians provide patients with a better treatment experience.

Charlotte / Bensheim. September 15, 2022. Dentsply Sirona recently introduced SureSmile® VPro™, SureSmile® Retainers and SureSmile™ Whitening Kit as part of its clear aligner treatment offerings in the US. SureSmile VPro helps accelerate orthodontic tooth movement and may help reduce patient discomfort^{1,2,3} during treatment while SureSmile Retainers and Whitening Kit maintain patients' brighter, whiter smiles once treatment is complete. The SureSmile Retainers are durable to withstand oral forces, including teeth grinding, without compromising effectiveness.*

The latest additions are part of the brand's ongoing commitment to provide doctors with clear aligner solutions for a comprehensive treatment approach.

SureSmile — helping patients feel sure about their smile

By drawing on twenty years of experience in digital planning for orthodontic treatment, SureSmile combines its unique understanding of patients' needs with advanced materials and technology to provide more predictable treatment plans with a comfortable and streamlined experience, fueled by results, to give patients the confidence boost that comes with a straighter smile.

SureSmile VPro is an orthodontic acceleration device that uses high-frequency vibration (HFV). When used with orthodontic treatment for just five minutes a day, the device delivers gentle vibrations that may reduce discomfort,^{1,2,3} improve aligner tracking, and accelerate tooth movement.^{2,3,4,5} and may speed up treatment time by up to 50 percent^{1,2}. The device will now be included in the SureSmile Complete Case offering, the comprehensive aligner package, and is also available to order as a standalone product.

The new SureSmile® Retainer is used to maintain the alignment of teeth at the end of aligner treatment to help keep a beautiful smile. When retainers are worn as prescribed, they are an effective tool to prevent teeth relapse. The SureSmile™ Whitening Kit will also be included with all SureSmile Aligner treatments in the US at end of treatment to provide patients with a brighter, whiter smile.

With the addition of these solutions, the SureSmile system is now able to provide more options to help address patients' needs throughout the clear aligner journey. "When patients come into my office, it's important that they're happy and feel equipped with the tools for a successful,
