

TAKING
ACTION FOR
A BRIGHTER
WORLD

BEYOND
BEYOND
BEYOND

As a global leader in oral health, we see it as our responsibility to step forward and drive change in our industry. We recognize our responsibility to the environment and are focused on becoming a more sustainable business.

And we will do so through our sustainability strategy called **“BEYOND: Taking action for a brighter world”**.

**Let's join forces and have a meaningful,
long-lasting impact, together -
for generations to come!**

For us, BEYOND means that, in partnership with all our stakeholders, we'll seek out ways to go a step further when it comes to the initiatives we participate in, how we do business, how we empower our people and how we drive meaningful change - for the planet and for society.

When finished with this seed paper postcard, **recycle it!** Plant in a sunny warm area and water often to grow colorful wildflowers.

Learn how to make your dental practice more sustainable

A suite of resources that will help all of us to be more environmentally conscious and sustainable is published in September, in partnership with FDI The World Dental Federation. It includes an activation roadmap indicating concrete actions to become more sustainable in your dental practice and more. Scan the QR code now to discover it.

NEW educational sustainability curriculum for dental professionals

Visit dentsplysirona.com/sustainabilitycourse to learn what sustainability means for the dental industry and why it is so important. During several inspiring, interactive modules, we will introduce you to key terms, goals and initiatives, including the FDI's Pledge for Sustainable Dentistry. You will also discover clear, practical steps for how to work more sustainably.

Join us at the **BEYOND sustainability booth** and participate in the **Smile Train fundraiser** to help provide children with cleft the care they need.
